GW'S TOP PICKS FOR IMPROVING YOUR ACOUSTIC GAME

Boulder Creek Guitars

Solitaire Series, Stage and Studio Series

Boulder Creek's new Solitaire Series and Stage and Studio Series of acoustic guitars feature the company's revolutionary SBS suspended bracing system, which allows the soundboard to vibrate more freely than conventional X-braced systems. The system uses aluminum tone bars suspended half an inch below the guitar's top. In addition to providing the necessary strength to support the bridge, the tone bars transmit the vibration of the strings to the contact points of the bars. The Solitaire Series features the soundhole on the top side of the guitar, facing the player, while the Stage and Studio Series has a conventional soundhole design. All Boulder Creek guitars have tops of solid sitka spruce or solid cedar, with solid mahogany or solid rosewood backs.

List Prices: With pickup, \$999.00; without pickup, \$712.00

Morgan Monroe

Imperial Series koa guitars

Morgan Monroe's new koa acoustic guitars are available in standard dreadnought and acoustic-electric cutaway styles and feature open-grained koa tops, backs and sides. Both styles feature bone nut and saddle, abalone soundhole inlay, pre-aged cream binding, brushed gold Grover Rotomatic tuning keys and rosewood fingerboard and bridge, and come with deluxe alligator-texture hardshell case and lifetime warranty. The acoustic-electric cutaway has a Fishman Classic-4 preamp and tuner.

MAP: (both) less than \$600.00
